SUMMARY

Engineer turned consultant and designer, with over ten years delivering end-to-end SAP implementations across SAP ECC and S/4HANA landscapes for the energy (hydrocarbon), retail, FMCG and agriculture sectors. I design, build and customise SAP Cloud Platform applications on SAP BTP and SAP BAS, and currently lead the technical delivery of an enterprise SAP BTP platform toward production launch across multiple vendor teams. Alongside that I design and ship consumer products end to end through my own company — research and design system through engineering, billing and release.

EXPERIENCE

Technical Lead

Chicken Farmers of Ontario · Toronto, ON · Sep 2024 – Present

- Lead operational readiness and the technical production launch of an enterprise SAP BTP platform, owning the implementation plan across pre-implementation, smoke test and post-launch support.
- Govern vendor-delivered development: SAPUI5 and CAP code review, daily stand-ups with application vendors and weekly technical meetings with services vendors, enforcing agreed coding standards.
- Review vendor architecture and technology stack against the target to surface integration risk before integration, alongside BTP setup, security and identity (IAS) and version-control practice.
- Own QA across all business domains for both SAP BTP (SAPUI5, CAP) and SAP Gateway services, resolving high and medium defects within the planned release window.
- Author SAP Gateway and ECC technical specification documents, and run production releases, Jira delivery and after-hours support.

Senior Software Developer

Chicken Farmers of Ontario · Toronto, ON · Apr 2022 – Sep 2024

- Built an internal audit application with a SAPUI5 front end integrated to Dataverse, keeping data dynamically maintained.
- Automated document upload to SharePoint through the Microsoft Graph API directly from the application.
- Ran user acceptance testing end to end, absorbing requirement changes and defect fixes through to sign-off.
- Redesigned a producer-facing data collection application in Figma following a focus group with farmers, then oversaw its build.

SAP UI5 Fiori Consultant

Baariz Technology Solutions / OCR Solutions · Doha, Qatar · Oct 2021 – Mar 2022

- Delivered SAP UI5 Fiori applications on a short international posting, establishing shared requirement vocabulary in week one across a multi-language, multi-culture delivery team.
- Hardened layouts for right-to-left and multi-language rendering.

Associate Consultant

Wipro · Bengaluru, India · Jan 2021 – Jul 2021

- Designed high-fidelity prototypes in SAP Build for a suite of paired request and administration workflow applications spanning expense, procurement and permitting for an energy-sector client.
- Treated the suite as one interaction system across nine deployments rather than nine separate applications.

Associate Consultant → Senior Consultant, Package Implementation

LTIMindtree · Bengaluru, India · May 2019 – Dec 2020

- Delivered master data governance applications for an FMCG client, including multi-stage approval matrices and master data request monitoring.
- Built cost centre and internal order management apps, and treated notification email templates as a designed interface surface.

Associate Software Engineer → Application Development Analyst

Accenture · Bengaluru, India · Oct 2015 – Mar 2019

- Delivered analytical and portfolio dashboards with drill-down and custom filtering, hierarchical data tables, sales and procurement transaction apps, process flows, org charts and document services.
- Built offline-capable enterprise mobile applications using the SMP SDK with Cordova and Kapsel plugins for plant and field users.
- Recognised with the Accenture Client & Customer Award for accelerating delivery toward a new Diamond Client relationship.

SELECTED PRODUCT WORK

Radioverse — station-first live internet radio

TritSync Incorp Inc. · listenradioverse.com · 2025 – Present

- Designed, built and shipped solo across every layer: research, design system, Next.js and Firebase engineering, Stripe billing, security hardening and production operations. Live in production.
- Curated catalogue across 34 markets with quality filtering, dedupe and genre balancing; playback resilience with mid-stream stall recovery; PWA with a Servist service worker.
- Mobile cold TTFB 3.1s to ~0.8s and CLS 0.673 to ~0.007.

Spellum — offline-first spelling learning for adults and ESL learners

TritSync Incorp Inc. · iOS, in development · 2025 – Present

- Measures transfer to unseen words rather than rewarding word-completion volume, so the app only claims progress it can evidence.
- Swift and SwiftUI, offline-first, with an OKLCH to Display P3 token pipeline and fail-closed content and distribution gates.

CORE SKILLS

SAP

SAP BTP · SAP ERP · SAPUI5 / Fiori · SAP CAP · SAP Gateway · SAP Build Work Zone · SAP BAS · ECC · S/4HANA · SMP SDK, Cordova, Kapsel

Design

User experience research · Focus-group facilitation · Figma · SAP Build · Design systems · Accessibility · Information architecture

Engineering

TypeScript · Next.js · React · Swift and SwiftUI · Firebase · Stripe · PWA and service workers · Astro · Git

Delivery

Technical leadership · Vendor governance and code review · QA strategy · Production readiness and launch · Technical specification authorship · Jira

CERTIFICATIONS

- SAP Certified Development Associate — SAP Fiori Application Developer (SAP, Sept 2020)
- SAP Certified Development Associate — SAP HANA 2.0 SPS04 (SAP, Sept 2020)
- Intelligent Enterprise User Experience with SAP Fiori 3
- SAP Fiori Overview: Design, Develop and Deploy
- Building Applications with SAP Cloud Application Programming Model

EDUCATION

Humber College — Postgraduate, User Experience (UX) Design · Toronto, 2021

M. S. Ramaiah Institute of Technology — B.E., Electrical and Electronics Engineering · Bengaluru, 2015

AWARDS

Accenture Client & Customer Award, team category — for contribution to client business outcomes, accelerating delivery toward a new Diamond Client relationship. Accenture Technology, December 2018
